

Dogs

<i>Vaccination</i>	<i>Maximum time from vaccination</i>	<i>Minimum time from vaccination on date of import</i>
Rabies	365 days	120 days*
Leptospirosis	180 days	30 days
Canine Distemper	730 days	30 days
Contagious Hepatitis (HCC)	365 days	30 days
Parvovirus	365 days	30 days

<i>Laboratory test</i>	<i>When?</i>	<i>Required result</i>
Brucellosis – blood sample	Within 30 d before import	Negative
Salmonellosis – faeces sample	Within 30 d before import	Negative – otherwise risk analysis by MAST

<i>Treatment</i>	<i>When?</i>
Echinococcus	Within 10 d before import
External parasites	Within 10 d before import

**Antibody titre test!*

Antibody titre test should be done on a blood sample within 30-365 days from rabies vaccination (at the earliest: 30 days after vaccination, at the latest: 365 days after vaccination). Antibody levels should be at a minimum of 0,5 a.e./ml.

Cats

<i>Vaccination</i>	<i>Maximum time from vaccination</i>	<i>Minimum time from vaccination</i>
Rabies	365 days	120 days*
Feline Panleukopenia	365 days	30 days
Feline Rhinotracheitis	365 days	30 days
Calicivirus	365 days	30 days

<i>Laboratory test</i>	<i>When?</i>	<i>Required result</i>
FIV – blood sample	Within 30 d before import	Negative
FeLV – blood sample	Within 30 d before import	Negative
Salmonellosis – faeces sample	Within 30 d before import	Negative – otherwise risk analysis by MAST

<i>Treatment</i>	<i>When?</i>
Echinococcus	Within 10 d before import
External parasites	Within 10 d before import

**Antibody titre test!*

Antibody titre test should be done on a blood sample within 30-365 days from rabies vaccination (at the earliest: 30 days after vaccination, at the latest: 365 days after vaccination). Antibody levels should be at a minimum of 0,5 a.e./ml.

Rabies-free countries

- Australia
- Faroe Islands
- Finland
- Hawaii
- Ireland
- Japan
- New-Zealand
- Norway (excluding Svalbard)
- Sweden
- United Kingdom

Pets being imported from rabies-free countries do not need a rabies vaccination. However, if an animal has travelled during the previous months, to a country where rabies is prevalent, it will need to be vaccinated against rabies.
