Part one Preface

Thank you for using China import food enterprise registration management system. In order to help you to get familiar with this system as quickly as possible, we have developed this user manual for your reference.

This manual provides information including installation procedures, system configuration, basic operations, software and hardware usage, and safety risks. When installing and using this system for the first time, please make sure to pore over this manual first, which will help you use this system in a better way.

This manual is designed for users with basic computer knowledge. Here, we assume that you are familiar with Windows 7/10 system, able to use the mouse to operate, and have the experience of using Google Chrome, 360 and other browsers.

Part Two Instructions

2.1 Official Website

The system is web-based, its address is: <https://cifer.singlewindow.cn>

2.2 System Environment

2.2.1 Operation System

Windows 7 or 10 (32-bit or 64-bit OS).
It's not recommended to use Windows XP.

2.2.2 Browser

Google chrome 50 and above

2.3 Entry Requirements

2.3.1 Entry Requirements

In the interface, fields with * are mandatory, and fields without * are optional. Fields with gray background cannot be entered. If a red message pops up next to a field while entering, it indicates that the information you are inputting does not meet the requirements, and you need to modify the information as suggested. The blue button is a function button.

Figure Entry of enterprise's basic information (partial)

2.3.2 Keyboard Operation

Some functions on the interface can be operated quickly by using the keyboard.

Click tab to automatically move the cursor to the input box of the next field. Click the up and down keys to select parameters from the drop-down menu on the interface. Click the backspace key to delete the content in the current input box.

2.4 General Functions

2.4.1 Move Tab

If there are many tabs open, click on the interface or icon to move left and right on the tabs.

2.4.2 Collapse/Expand Menu

Click the right display area-the upper left corner  icon to collapse or expand the left menu bar. After folding, the left menu bar only displays icons, and the effect is as shown in the figure below.

Figure Before and After Folding Manu Bar

2.4.3 Close Tab

Click on the right display area-the 关闭操作 icon in the upper right corner to pop up a drop-down menu (as shown in the figure below). Select "Close all tabs" to close all open tabs in the current display area; if you select "Close other tabs", you will close all open tabs except the currently displayed tab.

Figure Close Tab Operation

2.5 Log in or out of the System

Visit <https://cifer.singlewindow.cn>, input the user name and password, log in to the system, and enter the main interface of the system. Click the icon in the upper right corner to select the display language of the system.

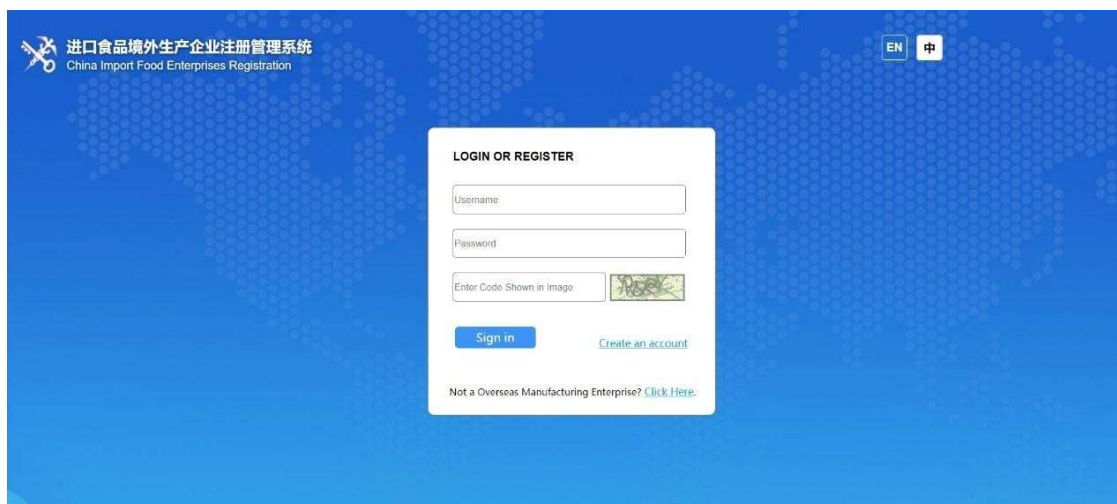

Figure System Portal

This system supports users from overseas manufacturers and overseas competent authorities. After entering the system, click 【Exit】 in the upper right corner of the interface to safely exit the system.

Part Three Introduction of the System

3.1 Users

Competent authority of the country (region) (hereinafter referred to as "competent authority"): the official department responsible for supervising the safety and health of food manufacturers in the country (region) where

the imported food manufacturers are located. Examine and verify the applications submitted by local manufacturers through the system, and recommend them to the General Administration of Customs, PRC (hereinafter referred to as "GACC"). Manage the registered manufacturers recommended by itself. Cooperate with GACC to review and supervise the rectification of registered manufacturers.

Overseas manufacturers of imported food (hereinafter referred to as "manufacturer"): manufacturers that produce, process and store food exported to China. Submit manufacturer registration application through the system, submit rectification materials, and receive notices from GACC, etc.

3.2 Introduction of functions

The registration management system for overseas manufacturer of imported food is to manage the registration of the overseas manufacturers of imported food, including the registration, change, renewal and cancellation of overseas manufacturers, and the inquiry of the application. The competent authority shall review and examine the applications of manufacturers and manage the registered ones.

The registration methods of overseas manufacturers of imported food include the registration recommended by the competent authorities of the country (region) where the manufacturers are located and the application of registration submitted by the manufacturer itself.

18 categories of food including meat and meat products, casing, seafood, dairy products, bird's nest and bird's nest products, bee products, eggs and egg products, edible fats and oils, stuffed pasta, edible grain, grain milling industry products and malt, fresh and dehydrated vegetables and dried beans, seasonings, nuts and seeds, dried fruit, unroasted coffee and cocoa beans, special dietary foods, health foods etc., shall be registered to GACC through the recommendation of the competent authorities of the country (region) where the manufacturers are located.

Manufacturers producing food beyond the aforementioned 18 categories shall register to GACC via themselves.

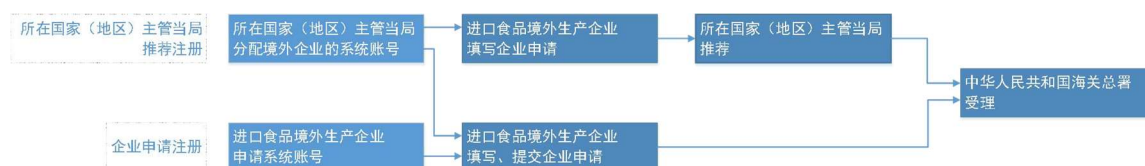

Figure Registration Process

Part Four User(account) Management

The account of overseas users used to log in the system can be obtained through either being assigned by the competent authorities or applied by the manufacturers, depending on whether the manufacturer needs “the recommendation of the competent authorities of the country (region) where the manufacturer is located”.

The system account assigned by the competent authorities can register for the manufacturers of all food product categories after logging into the system.

The account applied by overseas manufacturers themselves will only be eligible for the registration of manufacturers producing food beyond the 18 categories.

Reminder:

1. One overseas manufacturer can only apply for one overseas user account.
2. In case that one overseas manufacturer producing products requiring both “registration via recommendation of competent authorities” and “self-registration”, it’s recommended to obtain an assigned system account from the competent authorities, rather than applying one by themselves.

4.1 System account from the overseas competent authorities

Please contact your competent authorities to get an assigned system account from them.

4.2 System account applied by manufacturer itself

Visit <https://cifer.singlewindow.cn>, click “create an account “link, which will link to the log-in page, then enter your account information.

Figure overseas manufacturer account registration

Fields with (*) such as user name, password, work unit (manufacturer name) and registration number of the country (region) are required. After filling in these fields, click "Register Now" to complete the user account registration.

After account registration is completed, please relog in with your user name (account)/ password.

Reminder:

After successfully applying for an overseas manufacturers' user (account), the user name, country or region, registration number of the country (region) cannot be modified, please check carefully when registering.

4.3 Maintenance of Overseas Manufacturer Users (accounts)

After logging in to the system, click on the manufacturer's name in the upper right corner to access the user (account) maintenance function.

Figure Entrance of User (Account) Maintenance

Enter the user information management interface, you can modify the relevant information of the manufacturer, including the contact person, contact phone number, work unit (manufacturer name), work department, job title, contact address, contact fax, remarks, and email address.

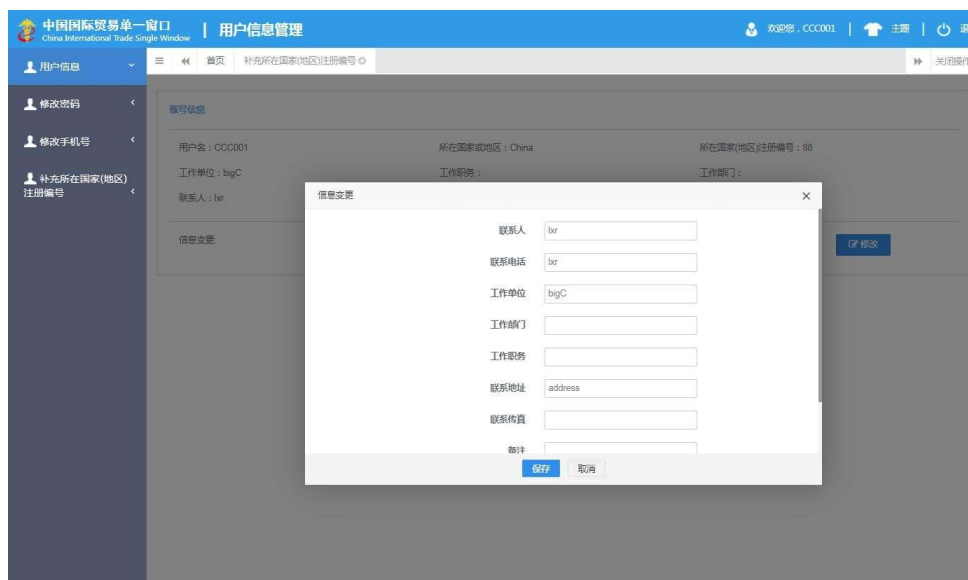

Figure User Information Management

If the "Registration Number of the Country (Region)" is not inputted during registration, additional input can be made through the "Addition of the Registration Number of the Country (Region)" function.

Part 5 Enterprise Registration

5.1 Registration application

Overseas enterprise logs in to the system with its own account. Click the “Registration Application” on the left side of the menu and select the product categories involved in registration. Product categories can be searched through

the “Product category query” function based on HS code or product name (please refer to section 5.3 herein for instructions).

The screenshot shows the 'Import Food Foreign Production Enterprise Registration' (进口食品境外生产企业注册) system. The left sidebar contains navigation options: 'Registration Application' (注册申请), 'Query' (查询), and 'Product Category Query' (产品类别查询). The main area displays a list of product categories under the heading '所在国家(地区) 主管当局批准注册, 请选择产品类别' (Country/Region of Origin, Authorized by Competent Authority, Please Select Product Category). The categories listed are: 肉与肉制品 (Meat and Meat Products), 蔬菜类 (Vegetables), 蔬菜与蔬菜制品 (Vegetables and Vegetable Products), 水产品 (Aquatic Products), 蛋与蛋制品 (Eggs and Egg Products), 食用油脂和油料 (Edible Oils and Oilseeds), 谷物类 (Grains), 食用谷物 (Edible Grains), 谷物制粉工业产品和麦芽 (Products of the Milling Industry of Cereals and Malt), 饮料和脱水蔬菜以及干豆 (Beverages and Dehydrated Vegetables and Dried Beans), 调味料 (Seasonings), 坚果与籽类 (Nuts and Seeds), 干果 (Dried Fruits), 未烘焙的咖啡豆和可可豆 (Unroasted Coffee Beans and Cocoa Beans), 特殊膳食食品(不包括乳基婴儿配方食品) (Special Dietary Foods (excluding infant formula based on milk)), 保健食品 (Health Foods), and 乳品 (Dairy Products).

Figure: Registration application – select the product category

Fill in the “basic information of the enterprise”, “production-related information”, “self-inspection information” and “attachment information” one by one, and submit the enterprise statement.

The screenshot shows the 'Basic Information of the Enterprise' (企业基本信息) form. The form is divided into several sections: 'Enterprise Basic Information' (企业基本信息), 'Production-Related Information' (生产相关信息), 'Self-Inspection Information' (自查信息), and 'Attachment Information' (附件信息). The 'Enterprise Basic Information' section includes fields for: '所在国家(地区):' (Country/Region), '所在国家(地区) 主管当局批准注册的注册编号:' (Registration Number), '所在国家(地区) 注册批准机构名称:' (Approval Institution Name), '(在华) 注册编号:' (Registration Number in China), '(在华) 注册时间:' (Registration Time in China), '(在华) 注册有效期:' (Registration Validity Period in China), '*所在国家(地区) 主管机构名称:' (Competent Authority Name), '*工厂名称:' (Factory Name), '*企业名称:' (Enterprise Name), '*厂/场/地址:' (Factory/Field/Address), '*企业网址:' (Enterprise Website), '*法定代表人姓名:' (Legal Representative Name), '*法定代表人职务:' (Legal Representative Position), '*联系人姓名:' (Contact Name), '*联系人电话:' (Contact Phone), '*联系人邮箱:' (Contact Email), and '*工厂建设日期:' (Factory Construction Date). The 'Production-Related Information' section includes '生产许可证编号:' (Production License Number) and '生产许可证有效期:' (Production License Validity Period). The 'Self-Inspection Information' section includes '自查项目说明:' (Self-inspection Item Description) and '自查项目备注:' (Self-inspection Item Remarks). The 'Attachment Information' section includes '附件说明:' (Attachment Description) and '附件备注:' (Attachment Remarks).

Figure: Basic information of the enterprise

After filling in all the information, click “Preview”. All information filled in will be displayed for the user to confirm. After confirmation, click “Submit”. The system will automatically submit the application to the competent authorities or declare to the General Administration of Customs (GACC), according to different product categories. Click “Back” for returning to the application page.

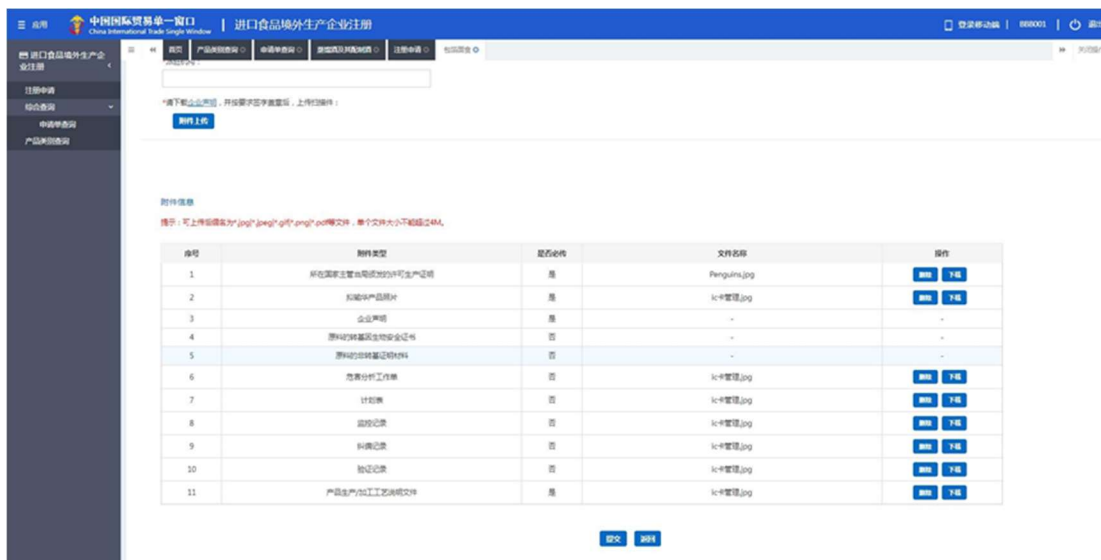

Figure: Preview of the application and submit

5.1.1. Registration recommended by the competent authority of the country (region)

Overseas enterprise logs in to the system with its own account. Click the “Registration Application” on the left side of the menu, and select the product categories involved in the registration.

Figure: Registration application – select the product category

Overseas food producers of the following 18 categories shall be recommended by the competent authorities of their countries/regions for registration with GACC: meat and meat products, sausage casings, aquatic products, dairy products, bird nests and bird nest products, bee products, eggs and egg products, edible oils and fats and oilseeds, stuffed wheaten products, edible grains, milled grain industry products and malt, fresh and dehydrated vegetables and dried beans, condiments, nuts and seeds, dried fruits, unroasted coffee beans and cocoa beans, foods for special dietary purposes, and health foods.

Overseas producers of foods other than those categories listed as above register with GACC on their own behalf.

5.1.1.1 Introduction to the registration process (take plant-based stuffed wheaten products as an example)

Registration Process:

1. General process

Input information → preview → submit the application to the competent authorities → recommended by the competent authorities → reviewed and approved by GACC (obtain the registration number for food in China)

2. Application is returned by the competent authorities to be completed, supplemented and corrected

Input information → preview → submit the application to the competent authorities → requested by the competent authorities to complete, supplement or correct the application → revise and resend the application to the competent authorities → recommended by the competent authorities → reviewed and approved by GACC (obtain the registration number for food in China)

3. Application is returned by GACC or (not recommended by) the competent authorities

Input information → preview → submit the application to the competent authorities → not recommended by the competent authorities (check through the “Integrated query – application query” function to view the return reason).

Reminder:

Applications that are not recommended by the competent authorities cannot be resubmitted with changes made. Enterprises are allowed to file a new application.

Main functions:

1. “Temporarily saved”. Input “enterprise information”, “production-related information”, “self-inspection information” and “attachments information” are saved temporarily, which can be deleted or be submitted to the competent authorities.

5.1.1.2 Instructions for information input

Fields marked with “*” are required to fill in. Here below are the instructions for the main fields.

Figure: enterprise registration application - interface one

序号	拟申请注册产品	HS/CIQ代码	品牌名称	拉丁字母	年设计生产/加工能力	实际生产/加工能力	操作
1	具体产品	190220000111	品牌	skjsk	101	100	删除
2	具体产品2	190220000109	品牌	181818	12	100	删除

Figure: enterprise registration application - interface two

- Registration number approved by the competent authority of the country (region): it will be filled in by the system based on the “registration number of the country (region)” filed in the enterprise’s account.
- Name of the competent authority of the country (region) that approves the registration number: the authority of the country that officially approves the establishment of the overseas enterprise, which is also the issuing authority of the country (region) for the enterprise’s registration number. This is an optional field.
- Name of the competent authority of the country (region): the authority of the country (region) that assigns this account to the enterprise. Click the space key or the triangle at the right side to select.
- Registration number (in China)/Registration time (in China) from/Registration time (in China) to: these fields can’t be filled in. GACC will grant a registration number after reviewing and approving the registration application of the enterprise. The enterprise will then be informed of this number through the “registration application query”

function.

- Enterprise name: it will be filled in by the system based on the enterprise's account information. This field is mandatory, and it can be edited but is not recommended to make changes.

Figure: input of products proposed to be registered/added in China

- Products proposed to be registered/added in China: this field is mandatory. Click "Add", an input page will be displayed where information for one product could be filled in. If the enterprise exports more than one product to China, it is required to fill in the product information one by one.

- *来源国家(地区): [Dropdown menu]
- *该原料/配料在产品中占比: [Text input]

Below these fields, there is a table for '原料/配料信息' (Raw Material/Ingredient Information) with columns for '序号' (Serial Number), '原料类型' (Raw Material Type), '文件名称' (File Name), and '操作' (Action).

Figure: input page to add raw materials/ingredients information

- Raw materials and ingredients information (list): this is an optional field. Click “Add” and an input page for raw materials/ingredients will be displayed. The parameter options of the “specific products exporting to China” come

from the “Specific products proposed to be exported to China” entered in the field of “Products proposed to be registered/added in China”.

- Pesticide use information (list): this is a mandatory field. If you choose “No pesticides have been used”, you could skip this field. If you choose “Pesticides have been used”, it is mandatory to enter the information of used pesticides. Click “Add” and an input page for used pesticides will be displayed. The parameter options of the “specific products exporting to China” come from the “Specific products proposed to be exported to China” entered in the field of “Products proposed to be registered/added in China”.
- Affiliated enterprises of the product: this is an optional field. Click “Add” and an input page for affiliated enterprises of the product will be displayed.

Figure: self-inspection information

- Enterprise statement: please download the statement to be signed and sealed. Then upload the signed and sealed statement in this field.

Figure: attachment information

- Attachment information: attachments uploaded in the parts of “basic information of the enterprise”, “production-related information” and “self-inspection information” are consolidated and displayed here.

5.1.2 Self-registration by enterprise

Overseas producers of foods that are not listed in the 18 product categories whose registration is recommended by the competent authority of the country (region) apply and register with GACC on their own behalf.

Overseas enterprise logs in to the system with its own account. Click the “Registration Application” on the left side of the menu, and select the product that can apply for registration directly with GACC. Here below are the instructions on application process by taking the “Spirits: distilled spirits and integrated alcoholic beverages” as an example.

Figure: Registration application – select the product category

5.1.2.1 Introduction to registration process (alcoholic beverage - distilled liquor and its mixed liquor)

Registration process:

1. General approval process

Input information Preview Submit to (General Administration of Customs) Approval by General Administration of Customs (get the registration number in China)

2. Supplementing and correcting process regarding replies provided by customs

Input information → Preview → Submission → Supplement and correction required by the General Administration of customs → Modify the application for re-submission → Approval by the General Administration of Customs (get the registration number in China)

3. Process regarding replies (registration denied) provided by customs

Input information → Preview → Submission → Registration denied by the General Administration of Customs (the reason for refusal can be viewed through “customs reply” in the comprehensive query function.)

Reminder:

If the registration is denied by the General Administration of Customs, it is not allowed to resubmit the

application by modifying the original one. Yet resubmitting a new application is allowed.

Major functions:

Submission: submit the application data for registration to the General Administration of Customs for review.

Other functions such as deletion and query are basically the same with those on the application page for products to be registered recommended by the competent authority to the General Administration of customs.

5.1.2.2 Instructions for information input

Fields marked with * on the page are required fields. For the completion of main fields, please see instructions below:

Figure Basic Information of the Enterprise 1

Figure Basic Information of the Enterprise 2

● Registration No. approved by the competent authority of the country (region) where the enterprise is located: backfilled by the system, which is the "Registration No. in the country (region) where the enterprise is located" filled in by the enterprise when registering the account.

● Name of the registration and approval authority of the country (region) where the enterprise is located: the name of the administrative authority granting qualification to the enterprise in the country where the enterprise is located; optional field.

- Registration No. (in China) / Registration time (in China) / Registration validity period (in China): the registration No. in China granted by the General Administration of Customs to the enterprise after approval. This field cannot be filled in during information input. After the registration application is approved, it will be provided by the customs. The enterprise can get the number through the function query of application form.
- Enterprise name: backfilled by the system according to account information of the enterprise; required field. You can edit this field, but modification is not recommended.
- Products to be registered / added with China: required field. After clicking [Add], the input interface will pop up, where you can enter multiple product information.
- Trade with China in recent 2 years: required field. If “Yes” is selected, the field is required; If “No” is selected, you don’t need to fill in it. If “Yes” is selected, list of specific products exported to China will pop up. After clicking [Add], the input interface for trade with China in recent 2 years will pop up. The parameter option of “specific products exported to China” comes from the “specific products to be exported to China” filled in in the field “Products to be registered / added with China”.
- Trade with China in recent 2 years (form): optional field. After clicking [Add], the option “products exported” will pop up; Click the blank space or the right triangle to call out the parameters; the parameter options of "specific products exported to China" come from the "specific products to be exported to China" filled in in the field "Products to be registered / added with China".

Figure Production Related Information 1

Figure Production Related Information 2

- Form for information on raw materials and ingredients: optional field. After clicking [Add], the interface for inputting raw materials / ingredients will pop up.
The parameter options of "specific products exported to China" come from the "specific products to be exported to China" filled in in the field "Products to be registered / added with China".
- Productive relations: optional field. After clicking [Add], the interface for inputting productive relations will pop up. The parameter options of "specific products exported to China" come from the "specific products to be exported to China" filled in in the field "Products to be registered / added with China".
- Production and processing water: water for public use or self-owned source of water is selectable. If self-owned source of water is selected, whether the water is disinfected need to be filled in, and the field treatment method for disinfection of self-owned source of water become required field, otherwise it is optional. If other is selected regarding the treatment method, the filed other treatment methods for disinfection of self-owned source of water become editable and required.
- Description of product processing process: required field. The attachment is optional.

Figure Enterprise Representation

- Enterprise representation: download the document first, sign and seal it, then scan and upload it here.

Figure Query of Application Form

Operating process:

1. Select query conditions and click [Query], the query results will be listed in the form below according to the query conditions.

2. Click the [View] button in the column data operation to open the application form and display the details. The application progress can be viewed in the upper right corner of the details page. According to the status of the application form, there are the following cases:

(1) If the enterprise is in the staged status or supplement and correction status. The application form can be edited, modified and submitted.

(2) If the products that enterprises can apply to the General Administration of Customs on their own are in the status of "sent to the customs failed" and "warehousing by the customs failed", the application form can be edited, modified and resubmitted (see the appendix at the end of this text for explanation on the status). If the application for products recommended for registration by the competent authority to the General Administration of customs is in the status of "sent to the customs failed" and "warehousing by the customs failed", the application form is not allowed to be modified or submitted.

Figure shows the 'Basic Information' (企业基本信息) form for an enterprise in a 'Staged' (申报中) status. The form includes fields for: Enterprise Name (企业名称), Address (地址), Country/Region (国家/地区), Registration Number (注册号), Registration Date (注册日期), and Contact Information (联系人信息). The status is 'Staged' (申报中). The form is partially filled with example data.

Figure Basic Information of the Enterprise (Staged Status)

(3) Application forms in the status of submitted to the competent authority, submitted to the customs (recommended), replied to the enterprise (not recommended), successfully sent to the customs, successfully warehoused by the customs, approval failed, approval granted, accepted, rejected, revoked, suspended and rectified, should not be edited, modified and submitted.
