

**GACC Announcement No. 103/2020**  
**(emergency preventive measures towards overseas cold chain manufactures in case of any positive nucleic acid test result of COVID-19)**

With the purpose of reducing risk of COVID-19 infections through imported cold chain products and protecting health and safety of consumers, GACC has decided to take the following emergency preventive measures towards overseas cold chain manufactures in case of any positive nucleic acid test result:

When any product or packaging from the same overseas cold chain manufacturer tested positive for the first and second time, GACC will suspend acceptance of product import declaration from the manufacturer for one week each time. The suspension is automatically cancelled after the week. If products or packaging from the same manufacturer tested positive for three or more times, GACC will suspend accepting product import declaration from the manufacturer for four weeks each time. The suspension is automatically cancelled after the four weeks.

This announcement takes effect from its date of publication.
